

When you Clicked on the Mac download in the email or from the site you will have downloaded a Mac.zip file as below, this will normally be in your Downloads folder unless you specify a different

You need to double click the Mac.zip file to expand this as its a compressed file. It will crate a new folder Mac in the same location as the Mac.zip unless you have specified for it to expand into another location. - open this folder and the Flipbook Application will be inside, double click it to run.

You might get the following message as below, just Ctrl and click and a menu will open and select Open and the file will run.

Once in the Flipbook, you can expand to full screen or reduce by using the icon on the bottom menu bar of the Flipbook when open.
